GENETIC DISEASE FOUNDATION BENEFIT DINNER

*Celebrating
a Decade
of Progress*

MONDAY, JUNE 11, 2007

PIER 60/CHELSEA PIERS • NEW YORK, NY

The Genetic Disease Foundation (GDF), a 501(c)(3) corporation, was established in 1997 by patients, parents and families who have suffered from genetic diseases. The Foundation's mission is to support research and education to prevent and cure genetic diseases and birth defects. Specifically, the GDF supports research to discover effective treatments and cures for genetic diseases and to improve and expand genetic testing to ultimately prevent these devastating diseases. Vital to the Foundation's mission is the education for patients, physicians, and the public to increase awareness about genetic disorders as well as the availability of genetic testing and counseling.

The Foundation is celebrating "A Decade of Progress" toward achieving its goals. Your support of this Benefit Dinner will ensure the needed financial resources to continue and accelerate the Foundation's efforts to prevent, treat and cure genetic diseases.
